Personal & Audience Strategy	5
Recommendations + Mock Ads	6
SEO & SEM Keyword Plan	7
Media Plan: Budget Reallocation	8
90-Day Campaign Calendar	9
Expected Impact & ROI Projection	10
AI Usage + Cross-Pod Collaboration	11

Executive Summary

Spend	Conversions	CTR	CVR	Blended CPA
$348,848	**98,975**	**2.28%**	**11.84%**	**$3.52**

Table 1. Q1 KPI summary across all channels. Blended CPA is calculated as total spend ÷ total conversions ($348,847.87 ÷ 98,975 = $3.52), representing the average cost to acquire one conversion across the full mix.

- **Display and LinkedIn are doing the heavy lifting.** They bring in most of our customers at a low cost per conversion.
- **Search is the weak spot.** It gets clicks, but far fewer of those clicks turn into customers, making it our most expensive channel.
- **Recommendation:** Shift the budget we already have toward what's working — grow the strong channels and campaigns, focus on efficient cities, and fix or pause the rest.

Performance Overview: Actual vs Benchmark

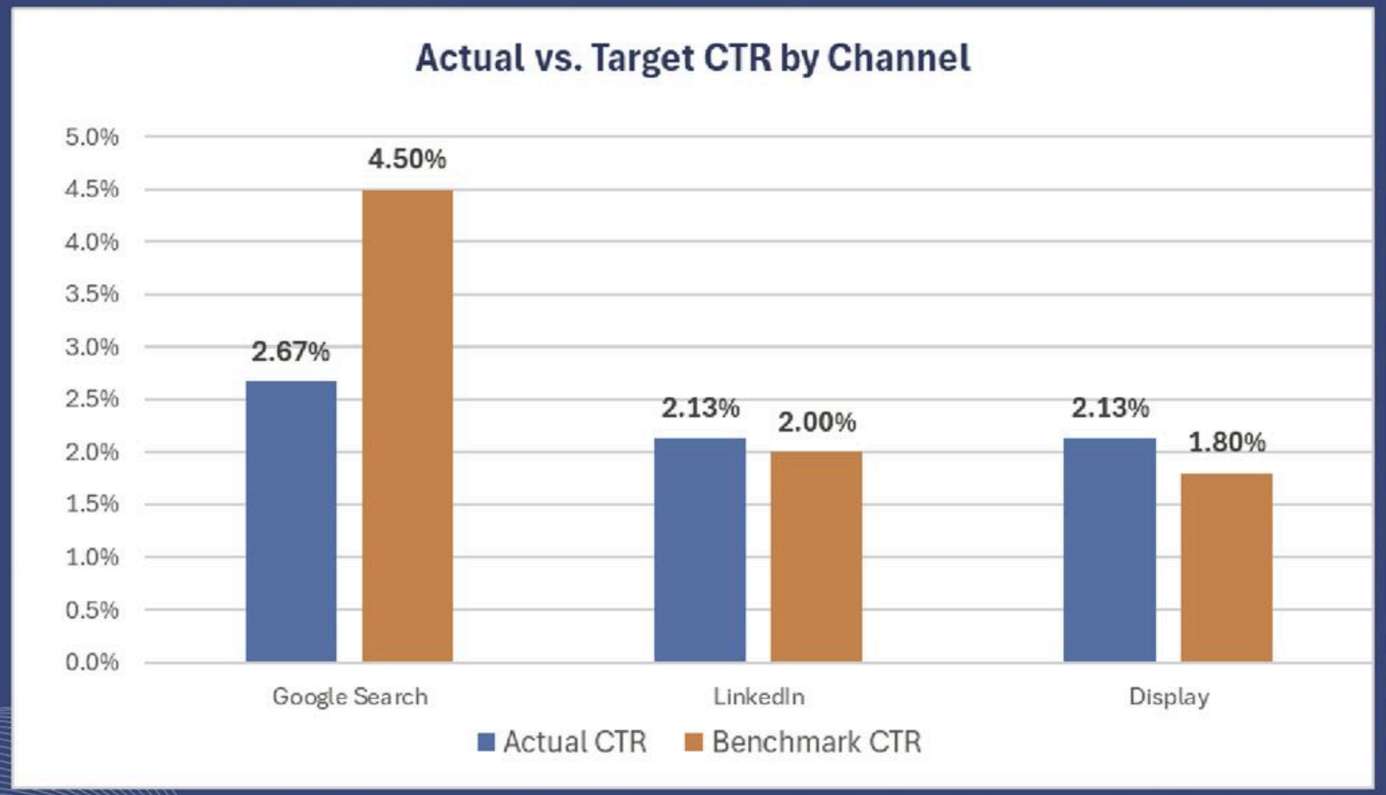

Figure 1. Q1 click-through rate by channel vs. LeadGenPro benchmark. LinkedIn (2.13% vs. 2.0%) and Display (2.13% vs. 1.8%) clear their targets; Google Search trails at 2.67% against a 4.5% benchmark.

KEY INSIGHTS

- **We're spending money well.** Every device brings in customers for about $2, versus the $60 to $75 we'd expect to pay.

- **Search is the one gap.** Only 2.67% of people click our search ads, compared to the 4.5% benchmark. The interest is there; the click isn't.

Channel Deep Dive: Search/Linkedin/Display

Channel	Conversions	Spend	CTR	CPA	CVR
Display	62,555	$136,445	2.13%	$2.18	14.37%
LinkedIn	17,430	$39,402	2.13%	$2.26	14.00%
Search	18,990	$173,001	2.67%	$9.11	6.87%

Table 1. Q1 channel performance. Display and LinkedIn together deliver ~80,000 conversions at ~$2.20 each, while Search delivers under 19,000 at $9.11 — driven by a 6.87% conversion rate versus ~14% on the other two.

KEY INSIGHTS

- **Same money, very different results.** Search spent $173K for 19K conversions; Display spent $136K for 63K. The fix isn't more budget, it's better placement.
- **Search costs about 4x more per conversion.** $9.11 vs. ~$2.20 on Display and LinkedIn. Shifting dollars to what's already working is the safest way to grow.

Device & Geographic Insights

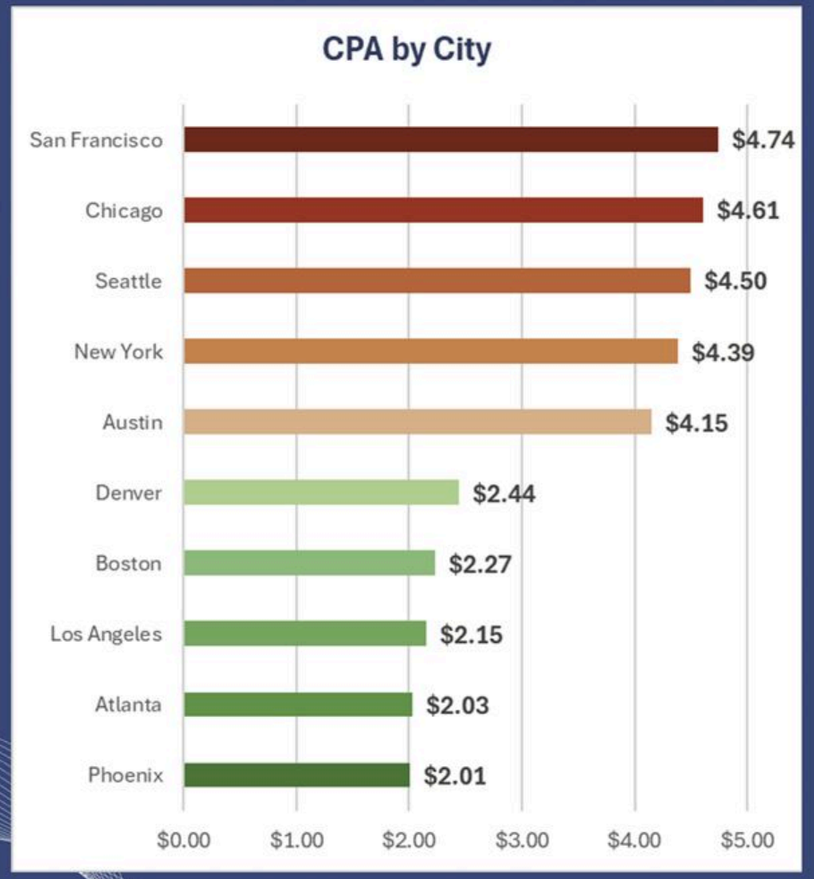

Figure 1: CPA by City. Cost per conversion in the ten largest markets, sorted from most to least efficient.

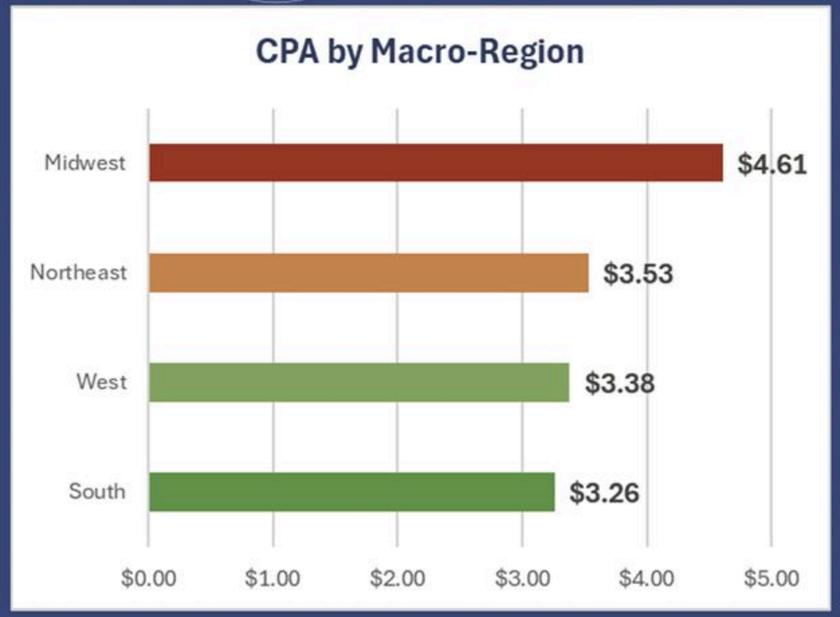

Figure 2: Cost per conversion rolled up to the four U.S. regions. The South, West, and Northeast cluster between $3.26 and $3.53, while the Midwest sits noticeably higher at $4.61.

KEY INSIGHTS

- **City:** Same campaigns cost about twice as much in saturated hubs ($4.74 in San Francisco) as in secondary markets ($2.01 in Phoenix).
- **Region:** Macro-region averages hide the real gap: the West contains both Phoenix ($2.01) and San Francisco ($4.74), so city-level decisions matter more than regional ones.

Device & Geographic Insights

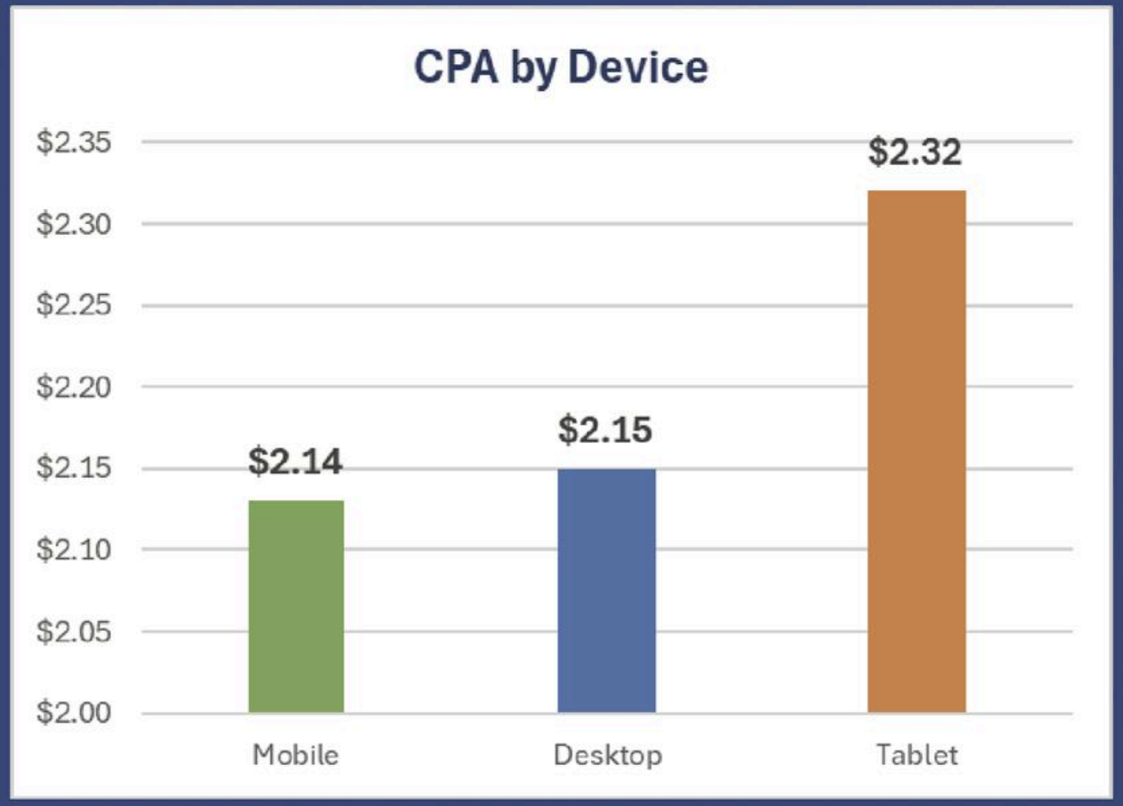

Figure 1: Cost per conversion across Mobile, Desktop, and Tablet on Display and LinkedIn. All three screens land within 19 cents of each other, showing performance is well-optimized regardless of device.

KEY INSIGHT

Mobile is under-used. Mobile is the cheapest at $2.14 per conversion, yet Desktop drives the most volume at 28,948 conversions. Same efficiency, more room to grow on mobile.

Persona & Audience Strategy

Primary Audience: B2B SaaS Buyer
Name: Alex Chen
Age: 32
Job Title: Revenue Operations Manager
Company Size: 150-300 employees (Mid-size SaaS Company)
Location (Focus):

- Atlanta, GA
- Phoenix, AZ
- Los Angeles, CA

WHO THEY ARE

- Alex works at a growing B2B SaaS company and is responsible for improving sales efficiency, lead management, and CRM organization. He constantly looks for automation tools that reduce manual work, improve team productivity, and help sales teams close deals faster. Because his company is scaling quickly, he values solutions that are efficient, easy to integrate, and capable of supporting long-term business growth.

Best Regional Markets

ATLANTA

PHOENIX

LOS ANGELES

WHY THESE REGIONS MATTER

- Growing SaaS ecosystems
- Startup heavy environment
- High adoption for automation tools
- Strong business development actvity

REGIONS SHOW:

- Low CPA
- Strong CVR
- Efficient Acquistion Behavior

Pain Points & Messaging Strategy

PAIN POINTS

- Fragmented CRM systems
- Inefficient lead management
- Manual workflows
- Poor sales visibility

MESSAGING THAT WORKS

- “Automate your sales workflow”
- “Improve lead quality”
- “Sync your CRM instantly”
- “Close deals faster”

BEST CREATIVE STYLE

- CRM dashboards
- workflow visuals
- analytics/UI screenshots
- productivity-focused layouts

Strategic Engagment Plan

WHAT DRIVES THEM

- Efficiency
- Automation
- Better lead quality
- Scalable workflows
- Productivty

WHAT THEY VALUE

- ROI & measurable results
- Easy integrations
- Time-saving
- Data visibility
- Growth scalability

RECOMMENDED CHANNELS

- LinkedIn Sponsored Content
- Google Search
- Retargeting Display Ads

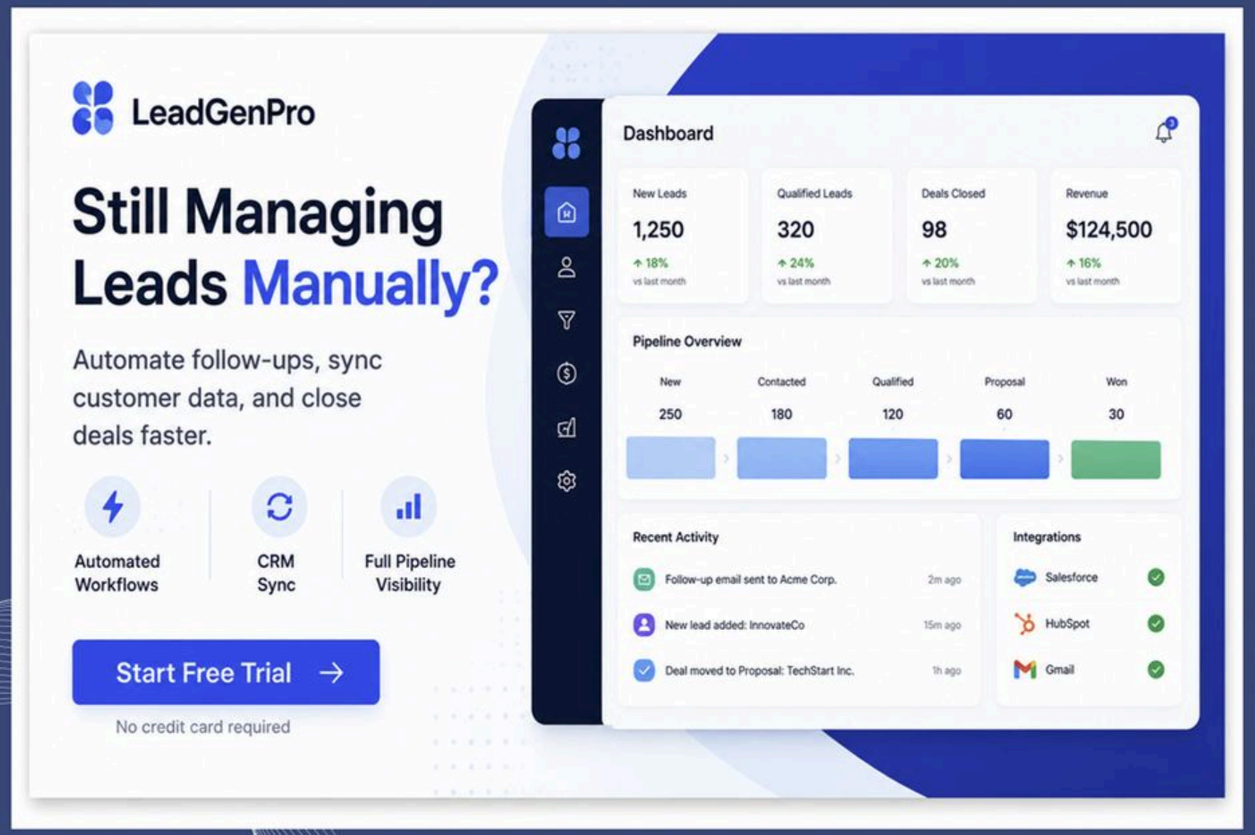

WHY?

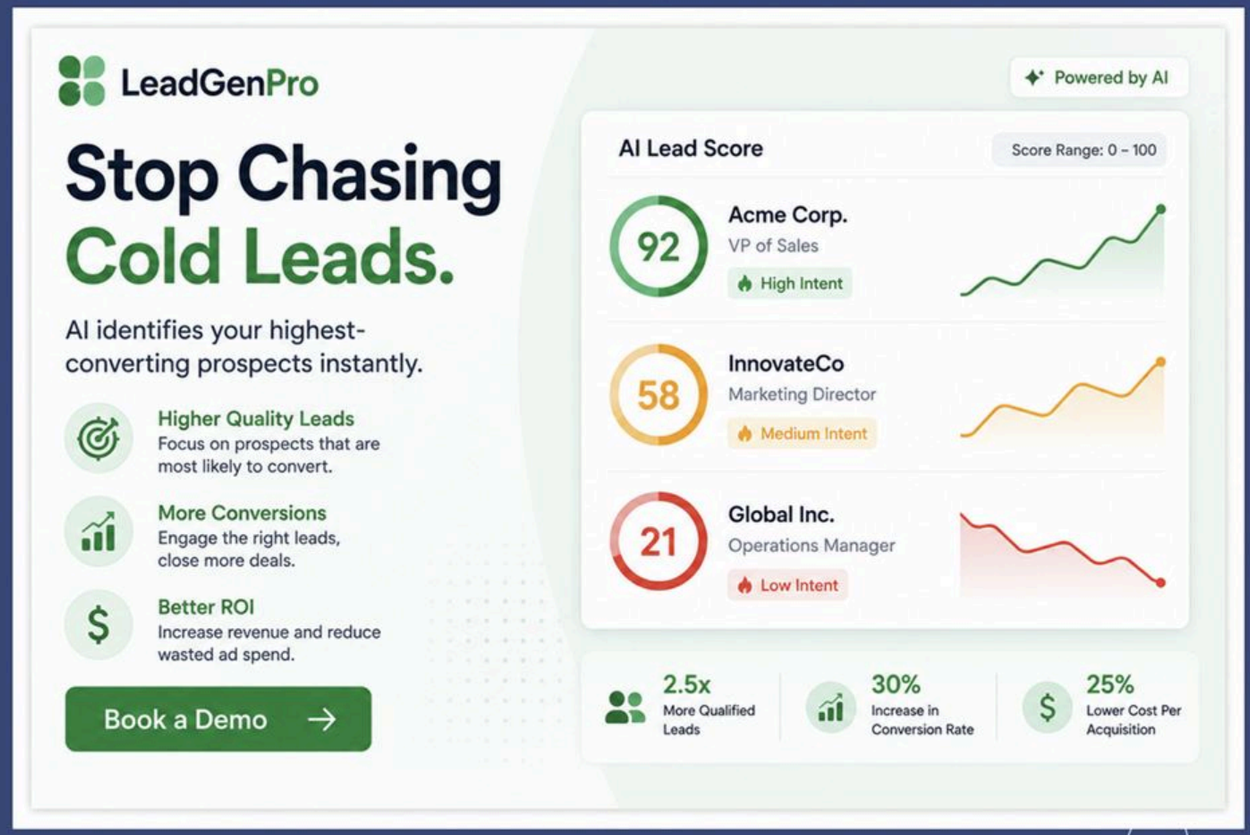

- Professional targeting
- High-intent traffic
- Strong retargeting efficiency

EXPECTED OUTCOMES

- Higher conversion quality
- Lower acquisition costs
- Stronger audience-message alignment
- Scalable growth potential
- Improved lead quality

Creative Recommendations + 2 Mock Ads

SEO & SEM Keyword Plan

Reccomended Keywords

Long-tail / high-intent
"CRM software for small business sales teams" — targets high-intent B2B buyers
"Lead generation software for B2B companies" — builds authority in CRM/SaaS

Branded / high-conversion
"LeadGenPro CRM" — owns brand + offering
"LeadGenPro reviews" — captures trust-stage searches

Blogs/Articles to Support Keywords

1. Best CRM Tools for Small Business Sales Teams: captures high-intent comparison traffic
2. CRM Integration Mistakes Businesses Make: educational, builds SEO authority
3. How AI Improves Sales Efficiency: thought leadership, aligns with product messaging

Key Insight: Better keywords, not more keywords. Narrower, branded, solution-focused terms aim to lift Search CTR toward benchmark before scaling spend.

Media Plan: Budget Reallocation

Strategic Direction

- Prioritize scalable, efficient campaigns
- Optimize weak campaigns before scaling
- Focus on conversion quality + efficiency

Channel	Performance Insight
Display / LinkedIn	79K+ conversions + lower CPA
Search	High intent but weaker efficiency
Mobile	Lowest CPA
Tablet	Highest CPA + weakest performance

Budget Reallocation Focus

- Product-value messaging
- SaaS workflow integration
- Conversion-focused creatives

Increase	Maintain + Optimize	Reduce/Test
Display / LinkedIn	Search	Weak search campaigns
Mobile campaigns	Desktop	Tablet spend

90-Day Campaign Calendar

Test → Learn → Shift → Scale

Phase 1 Testing (Weeks 1–4)	Phase 2 Optimization (Weeks 5–8)	Phase 3 Scaling (Weeks 9–12)
• Test audience-specific messaging • Refine keyword targeting • Test mobile-first creatives • Compare CTA performance	• Shift spend toward high-performing channels • Improve landing page alignment • Reduce inefficient tablet spend • Pause weak search keywords	• Scale top-performing campaigns • Expand high-performing audiences • Increase branded search investment • Grow retargeting campaigns

Expected Impact/ROI Projection

Expected Strategic Impact

- Improve conversion efficiency
- Increase CTR performance
- Strengthen mobile conversion growth
- Improve audience targeting precision
- Increase campaign scalability

Long-Term Strategic Outcome

- Improve efficiency before scaling
- Strengthen conversion quality
- Reduce wasted spend
- Support sustainable growth

Area	Expected Impact
Mobile Investment	Lower CPA + stronger conversion efficiency
Display / LinkedIn Scaling	Increased conversion volume
Search Optimization	Improved CTR + keyword efficiency
Weak Campaign Reduction	Reduced wasted spend
Product-Value Messaging	Higher engagement + stronger CVR

AI Usage

Team Member	Tool	How We Used It	Outcome
Angelic	ChatGPT	Compared our pod's data against another cohort's dataset	Surfaced discrepancies in the comparison data
Angelic	ChatGPT	Pressure-tested presentation flow against our data + project brief	Built a logical, story-driven deck structure
Koey	ChatGPT	Generated mock ad concepts and copy variations	Faster creative ideation for the recommended ads
Erick	ChatGPT	Refined writing structure, recommendations, and formatting against project requirements	Clearer, presentation-ready content aligned to each role
